## WHAT'S IN BETWEEN YOU AND THE OPEN ROAD?

It's easy to take the security of your car's glass for granted, especially when spending so much time behind the wheel. But how protected are you?

**Clearshield® WPF Windshield Protection Film** – the latest innovation in Solar Gard's established family of exterior vehicle solutions – acts as a protective barrier for your windshield against rock chips, debris and other road hazards.

As the largest single piece of glass in most cars today, a damaged windshield can cost you precious time, money and peace of mind. Drive with confidence knowing you've got Clearshield WPF providing continuous protection for you and your passengers.

# WHY CLEARSHIELD WPF WINDSHIELD PROTECTION FILM?

## DURABLE, CONTINUOUS PROTECTION

You've got enough to worry about. Let Clearshield WPF take care of guarding your windshield against the open road and boosting your driving safety overall.

We've put WPF to the test – literally. From aging trials to impact and abrasion resistance simulations, its durability has been proven to add a critical layer of protection to your vehicle.

## MORE AFFORDABLE, CONVENIENT AND SECURE ALTERNATIVE

Repairing or replacing a cracked windshield – along with the necessary recalibration of ADAS (Advanced Driver Assistance System) components – is becoming increasingly more expensive. Aftermarket replacements can also impact resale value and void manufacturer warranties, while incorrect ADAS recalibration can affect system accuracy. Replacing an original windshield can also lead to fit and seal issues, potentially causing leaks, wind noise or reduced structural integrity. And let's not forget the possible damage to your car's paint and interior during the replacement process.

Sensing a trend here? Having Clearshield WPF installed by an authorized Solar Gard dealer is a much more cost-effective and convenient alternative for extending your windshield's life. Your wallet and schedule will thank you.

## GREATER INTERIOR COMFORT AND UV PROTECTION

Protected and more comfortable? Now we're talking. Not only does Clearshield WPF work to keep your windshield intact, it also boasts solar control properties that block uncomfortable heat. And with integrated UV inhibitors, WPF enhances the existing sun protection of your windshield to help guard your interior against premature fading and damage.

## OPTICAL CLARITY

We call it "the best protection you'll never see" for a reason. Clearshield WPF seamlessly adheres to your windshield with no change in visibility.

## IMPROVED RESALE VALUE

A well-maintained windshield can make a significant difference when it's time to sell your vehicle. Keep your car in top condition and attract potential buyers with pristine factory glass.
