

Solar Control, Safety and Security Window Films

Solar Gard® Architectural Window Film

Solar Gard window films provide a wide range of benefits to meet your needs.

Improved Comfort

Whether it's a corner office or tables by an expansive window, keep every area of your building a consistent and comfortable temperature.

Lower Energy Consumption

Solar Gard window films are a cost-effective retrofit solution that's easy to install and proven to reduce energy costs by up to 30%.

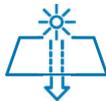

Reduced Carbon Emissions

Reduce greenhouse gas emissions and your building's carbon footprint for less money than new windows.

Safety and Security

Gain protection against break-ins, vandalism and theft without blocking views or changing your building's external appearance.

Decreased Glare

Enjoy your views without having to use blinds to block excessive glare.

Fade Control

Block 99% of UV light, the primary cause of interior fading.

Skin Protection

Solar Gard films provide a Sun Protection Factor of 285+ to help protect from harmful UVA and UVB rays associated with skin cancer and premature aging.

Enhanced Appearance

Choose from a wide array of tints and colors, from optically clear to fully reflective, which allows you to change the appearance of your buildings as much or as little as you like.

Greater Privacy

Protect your occupants from onlookers and passers-by with a reflective film that blocks views into your building.
