VLT - Visible Light Transmission    TSER - Total Solar Energy Rejection  
 VLR - Visible Light Reflectance    UV - Ultraviolet Protection

The solar performance data reported for SunTek® automotive window films was captured using the National Fenestration Rating Council's (NFRC) standard guidelines for window film solar performance measurement as measured on single pane, 1/4 inch (6mm), clear glass. Reported values are taken from representative product samples and are subject to normal manufacturing variances. Actual performance will vary based on a number of factors, including glass type and properties.

- Dyed charcoal construction
- Non-reflective interior and exterior appearance
- Good heat rejection, glare reduction and UV protection
- Exceptional optical clarity
- Manufacturer's three-year limited warranty\*
