Visible Light Transmission	33%
Total Solar Transmission	26%
Total Solar Reflectance	31%
Total Solar Absorbance	43%
Visible Light Reflectance	
Interior	18%
Exterior	30%
Winter U-Value	1.00
Ultraviolet (UV) Protection	99%
Glare Reduction	64%
Shading Coefficient	0.44
Solar Heat Gain Coefficient	0.38
Total Solar Energy Rejection	62%

Data captured using National Fenestration Rating Council's (NFRC) guidelines on single pane, nominal 1/8 inch (3mm) clear glass. Reported values are taken from representative product samples and are subject to normal manufacturing variances. Actual performance will vary based on a number of factors, including glass type and properties

BENEFITS

- Clean, natural appearance
- Low interior reflectivity provides unaltered views
- Outstanding solar performance is ideal for areas with excessive sun exposure
- Blocks 62% of the sun's energy, increasing comfort while reducing cooling costs
- Blocks 99% of the sun's damaging UV rays helping to extend the life of upholstery, carpet and window treatments
- Manufacturer's limited warranty*

* Certain restrictions apply; see an authorized dealer for manufacturer's limited warranty details.

ARCHITECTURAL WINDOW FILM

EXTERIOR

ENERGY EFFICIENT

SunTek® window films can significantly improve energy savings* by reducing heat gain and helping eliminate hot spots. In fact, professionally installed SunTek® window films can help prevent up to 83% of the sun's energy from altering the internal environment of a home or office building.

ENVIRONMENTALLY FRIENDLY

All SunTek® products are environmentally friendly. SunTek® Window Films also supports environmental causes through volunteerism as well as employee and corporate donations. To learn more about our environmental efforts and for complete product information, visit our website at suntekfilms.com.

*The amount of savings will differ based on window film used and the size, construction, and geographic location of the home/building.
