Solar Heat Gain Coefficient	0.18
Total Solar Energy Rejection	82%

*Wavelengths 300-380nm. Data captured using National Fenestration Rating Council's (NFRC) guidelines on single pane, nominal 1/8 inch (3mm) clear glass. Reported values are taken from representative product samples and are subject to normal manufacturing variances. Actual performance will vary based on a number of factors, including glass type and properties.

BENEFITS

- Clean, natural appearance
- Low interior reflectivity provides unaltered views
- Outstanding solar performance is ideal for areas with excessive sun exposure
- Blocks 82% of the sun's energy, increasing comfort while helping to reduce cooling costs
- Blocks >99% of the sun's damaging UV rays helping to maintain the life of upholstery, carpet and window treatments
- Backed by a manufacturer's limited warranty*

* Certain restrictions apply; see a dealer for details.

The Skin Cancer Foundation recommends this product as an effective UV protectant.
